PETCORE EUROPE

Serving the Members

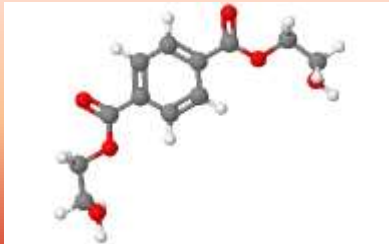

4 examples of supporting activities

LCA Platform

Thermoforms
WG+Functional Barrier
Consortium

BHET Consortium

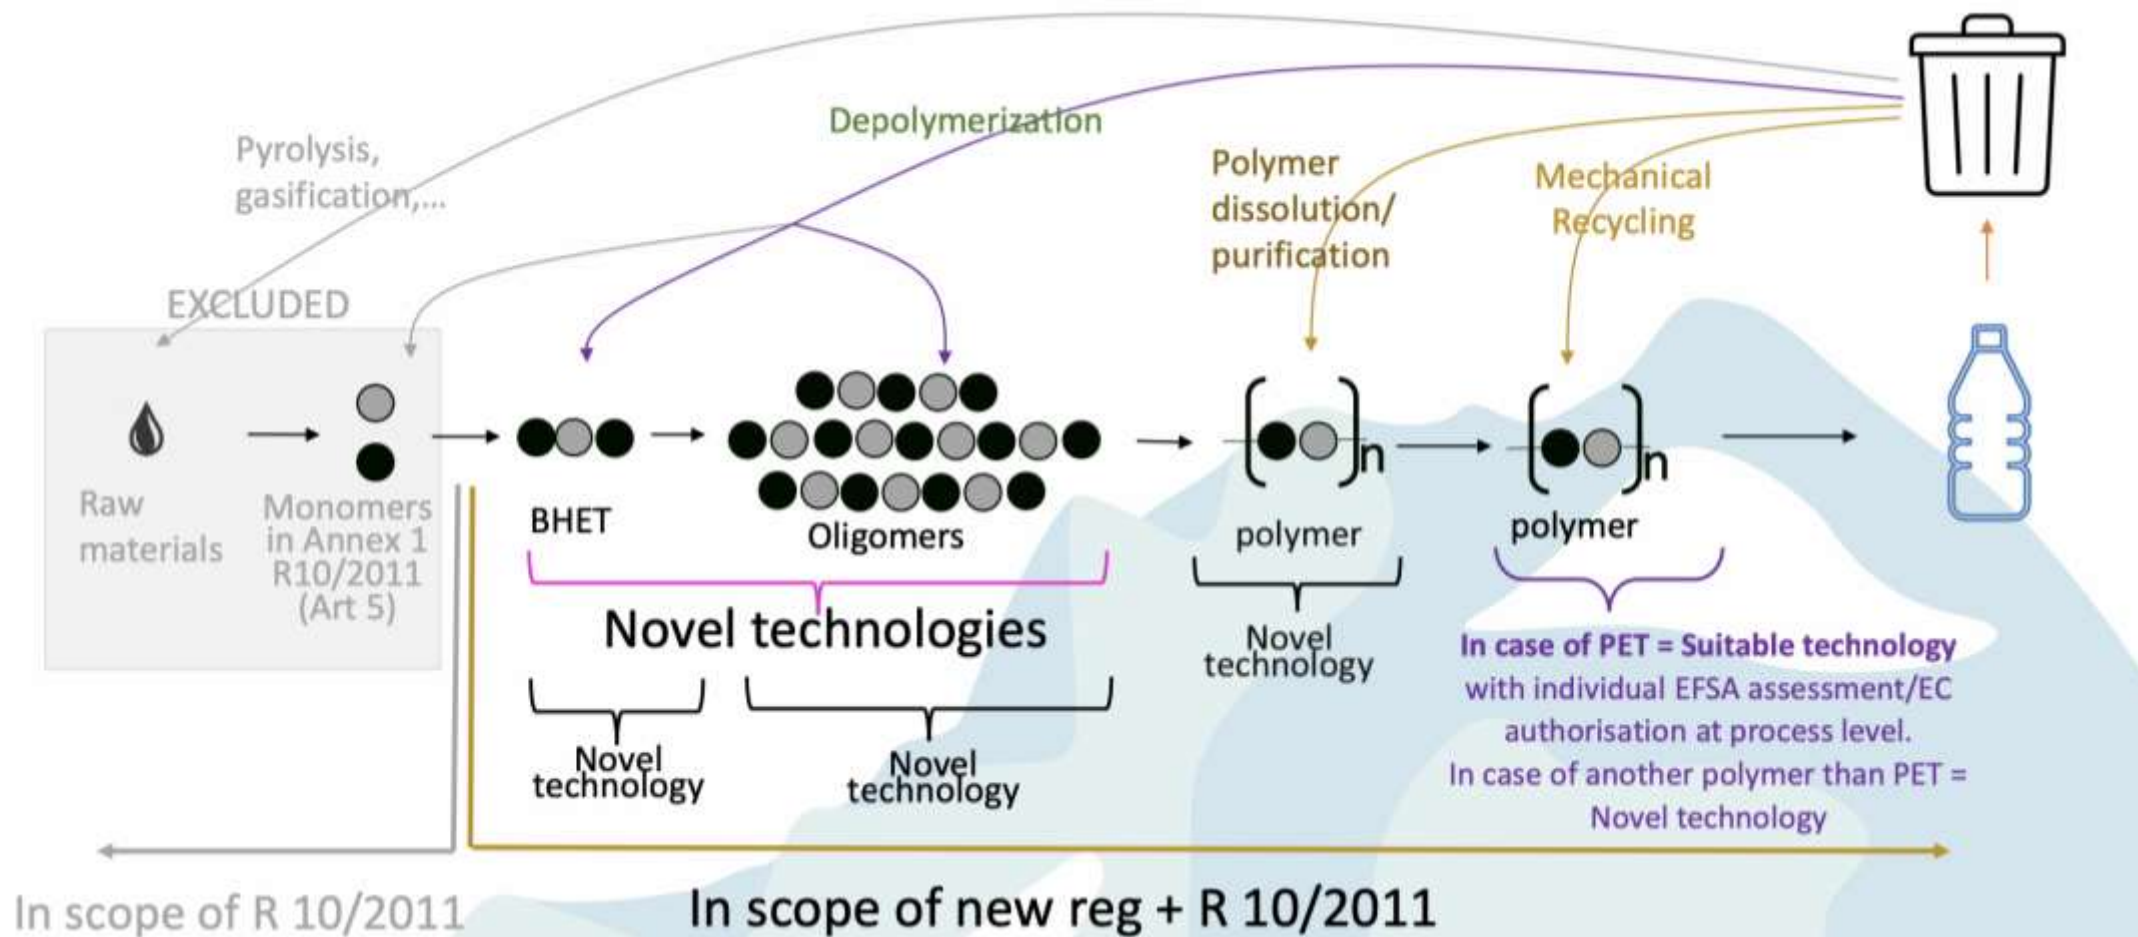

NIAS and *Labs* Platform

BHET Consortium

- **PETCORE EUROPE** has a **depolymerization** Working Group
- The activities are set to support the **deployment** of the **technologies** to reach **circularity** for the maximum amount of PET Packaging and Polyester textiles
- As per **EU 2022/1616 regulation** there are different scenarios for depolymerization (see next slide)

BHET Consortium

BHET Consortium

- As for the Functional Barrier, PETCORE EUROPE has established a **consortium** for 5 of its members
- The **BHET Consortium** is again striving to **reducing costs and time** and making sure the **industry** is **coordinated**
- The consortium has delivered the **notification dossier and also the 3 monitoring reports** needed up to now.
- It also helped **developing** the right **measurement techniques** as this was not existent.
